

*Dubious*

a controller for performing processing of reconstructing data stored in any of the storage units in which a fault has occurred based on all other data of a corresponding one of the data groups and corresponding error correcting data, and processing of data read/write requests from a host;

*A2*

*Amend.*

wherein the controller performs the processing of reconstructing data instead of the processing of data read/write requests such that the processing of reconstructing data is completed within a fixed time.--

*entirely
